

# Balfour Beatty Communities

---

NAVASTA Newport • Building 369, Green Lane • Middletown, RI 02842

August 17, 2010

Dear Resident,

Over the past month, our neighborhoods have been experiencing a few changes as we strive to make improvements and updates to our communities.

An upgrade to the natural gas line infrastructure project has begun in our Coddington Cove neighborhood and will now begin in Greene Lane. This is a Navy initiative that requires Balfour Beatty support and will benefit our residents.

What this means for our residents is this natural gas upgrade project will be occurring within the streets and yards of nearly every home. The Navy and National Grid, is responsible for this project and will be providing oversight, Balfour Beatty will be working in conjunction with both parties to ensure all activity in the neighborhood is communicated and we keep you informed of the progress.

During this project, some roads and sidewalks may be blocked off for construction, however, we are working with National Grid to phase this activity so as to reduce the impact to you.

**Starting this week they will be starting on the roads in Lower Greene Lane neighborhood and some roads may be closed to thru traffic.** However, it will be open for residents who live on those streets. A traffic control officer will be on site during the working hours to assist in helping our residents get in and out. At the end of each workday the road will be open to all traffic.

Thank you in advance for your cooperation. If you have any questions, please contact our office at 401.846.8877.

Sincerely,

Linda Miller  
Community Manager
